Requirements

1. Metamask 🦊 : [Installation guide](#)
2. Configure Metamask to include Polygon Test Network: [Configuration guide](#)
 - a. RPC URL: https://polygon-mainnet.g.alchemy.com/v2/l8Ew7ZWre1Od2_v05oEstuuXYdEp-KLc
 - b. Chain id: 137

Networks

Network Name

Matic Mainnet

New RPC URL

https://polygon-mainnet.g.alchemy.com/v

Chain ID ⓘ

137

Currency Symbol (Optional)

MATIC

Block Explorer URL (Optional)

In order to post a bounty on our platform, these are the things required :

1. A **Github** account
2. Matic tokens/ DEV tokens to pay for rewards
3. Matic tokens to pay for Gas fees
4. **Github** issue URL for the bounty

In order to vote on a solution, these are the things required:

1. A Github Account
2. Matic tokens to stake and cast your vote
3. Matic Tokens to pay for Gas fees

In order to solve a bounty, these are the things required:

1. A **Github** Account
2. Matic Tokens to pay for Gas fees
3. **Github** repo for submitting a solution
4. Documentation (.pdf or .txt) to be uploaded as a **work plan** if required. A work plan can consist of architectural flow diagrams, tech stack, and/or explanations about the solving process that a developer follows while working on a bounty. This is important as this gives a high-level image of the entire thought process. Being an open-source platform, multiple developers can build on the same work plan or submit a different one, as per their preferences.

Note :

- Once a public address is used for posting a bounty, you cannot use a different public address.
- Once a public address is used for posting a solution, you cannot use a different public address.
- Once a public address is used for voting on a solution, you cannot use a different public address.
- Our website might not auto-update in some scenarios. Please reload to see the changes.

- The login process might take some time to complete. Once logged in, your avatar will replace the log-in button in the top right corner.
- You can access all the features after you login to the website.
